

How can I choose a domain name;

- 2022-11-25 - Domain TLDs

Choosing the right domain name is an important decision from sales and marketing perspective since this domain name is going to represent your company online. We recommend that you choose a name which refers directly to the company's or organization's name (e.g. company name, trademark, etc.) or a general idea about your website (e.g. subject, key word, etc.).

Some technical rules are:

- You can use either the English or Greek alphabet. You can also use the numbers "0-9" as well as the hyphen "-" to separate words.
- There is no distinction between capital and non-capital letters.
- "_" and "/" are not accepted.
- Spaces and any other symbol, except those mentioned above, cannot be used.
- You cannot use both Greek and English letters in the same domain name.
