

## What is the .GR Domain Names Registration Check?

- 2022-10-08 - Extra υπηρεσίες

All Greek Domain Names registrations are subject for approval from EETT, the Greek Government Authority for Domain Registrations. The approvals are made every 5 days.

That means that you should wait about 5 days to be sure that EETT will not disapprove and cancel your registration.

With our Domain Names Check Service, a Domains Consultant checks if your registration is valid according to EETT regulations, so that you are sure it will not be cancelled by EETT after 5 days.

In this way you can be sure that you meet the registration requirements of EETT and that your domain will not be canceled suddenly in the future.

If the consultant finds errors in your application, the registration will be canceled and the cost will be refunded so that you will be able to make your registration again in the right way.
