

What can I administer through the Papaki Control Panel?

- 2022-09-24 - Papaki Panel

The Control Panel at Papaki is one of the most modern and functional in the market, supporting multiple functions for both advanced users and beginners.

Below are some of the supported actions:

- Real time Nameservers management
- DNS hosting management
- Management of contact persons' information (Owner, Technical person in charge etc)
- List of Domain Names that expires in the near future
- Renewal of Domains Names in real time
- Renewal and upgrade of hosting services
- Web Forward management
- Payment History
- Pending Payments & payment confirmations etc.
- Update and Renewal of eCommerce services (eShop plans)
