

How can I change PHP version via Plesk?

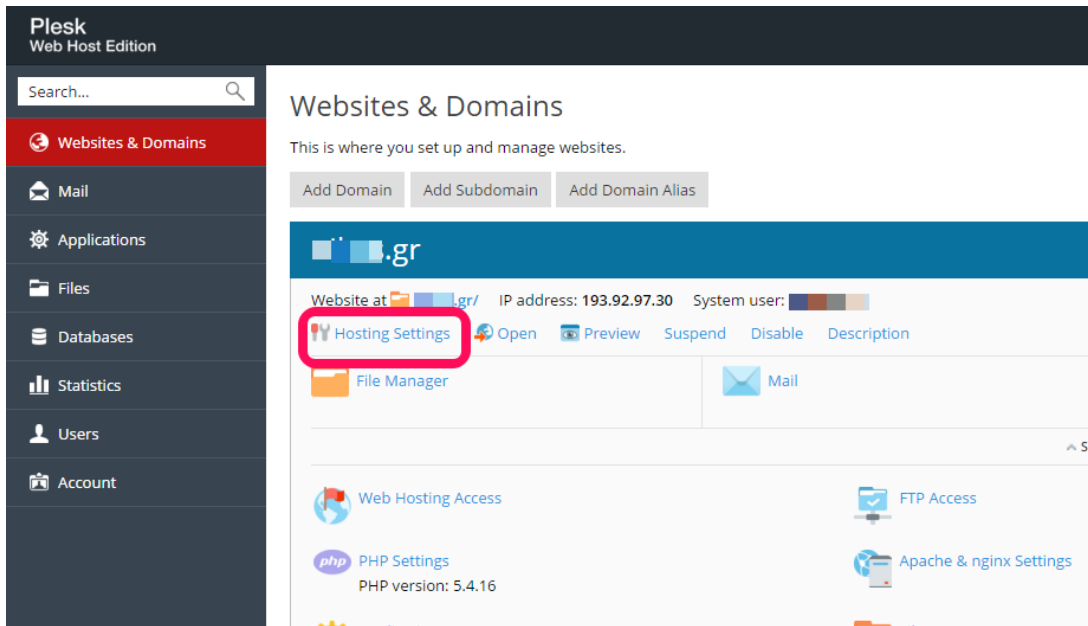

- 2022-12-27 - Γενικά

If you want to change the Php version, follow the steps below:

1. **Log in to** Plesk using the credentials you received in the hosting activation email

2. Go to **Websites & Domains** and choose **Hosting Settings**.

3. From the Drop Down menu, in the field Php Support, choose the Php version you want, click Apply and OK
