

How do I create a database in Plesk Onyx?

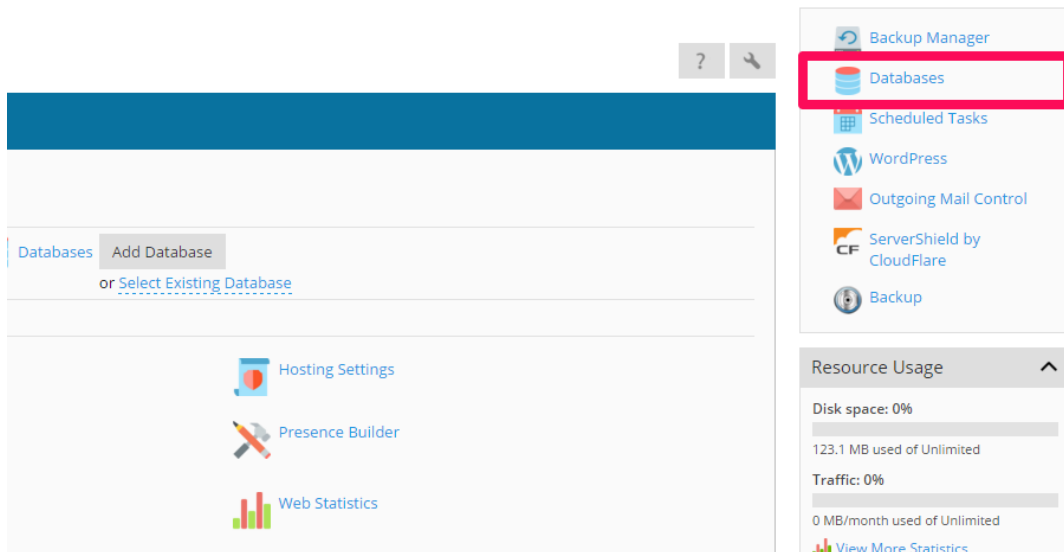

- 2023-02-05 - Databases

If you want to create a database in Plesk, follow the steps described below:

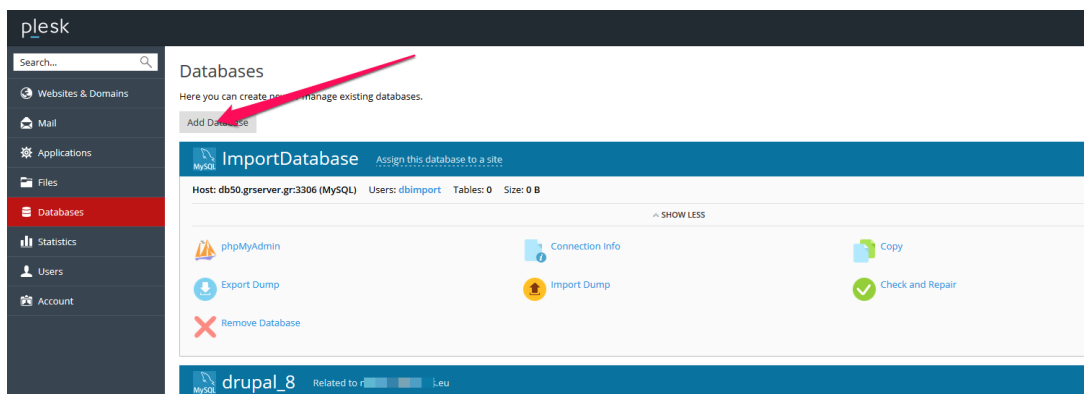

1. Log in to Plesk

2. Go to the tab Websites & Domains and click Databases

3. Choose Add Database

4. Enter

a. The Database name

b. From the Drop Down menu, choose the site you wish to connect the database with. If you just want to create a database without connecting it to a website, do not choose anything from this menu.

γ. The database username

6. The database password twice and OK

Databases

Add a Database

General

Database name *

DbKB1_

Database server

db50.grserver.gr:3306 (default for MySQL, v10.1.13)

Related site

No related sites

Users

Create a default database user. Plesk will access the database on behalf of this user. If no database users are assigned to the database, it is not accessible.

☒ Create a database user

Database user name *
