

The style tab

- 2022-12-08 - Website Builder

The Style tab allows you to change the style of your whole site.

Style options

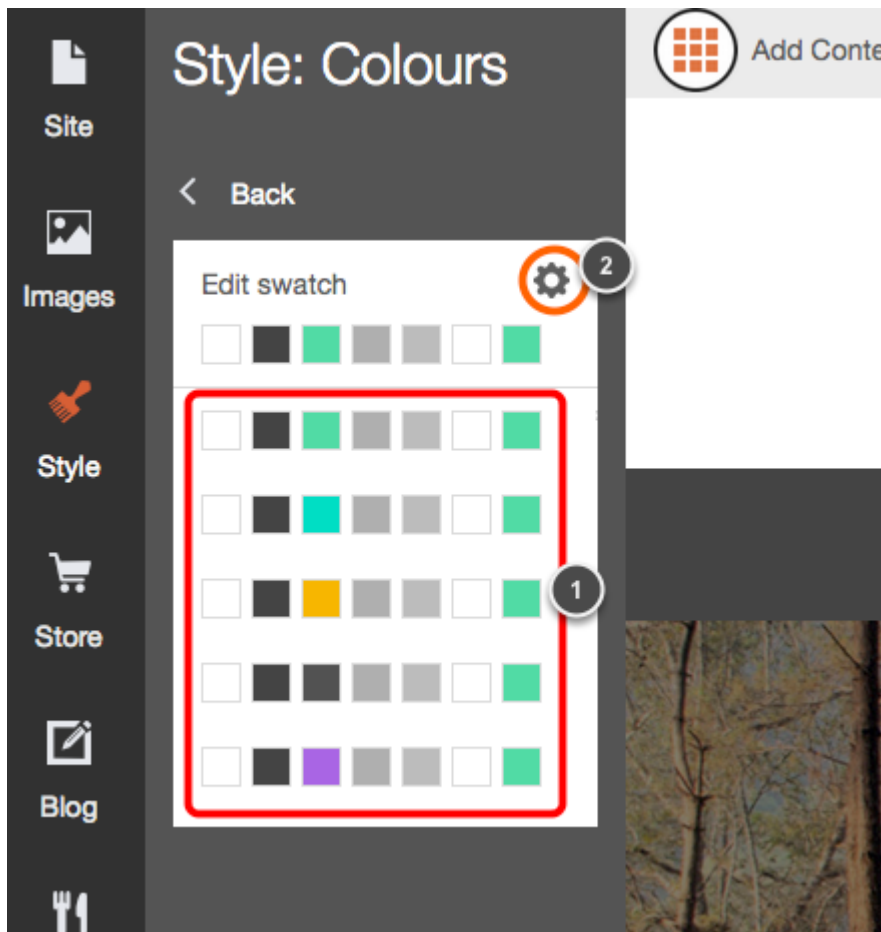

The Style tab will help you to

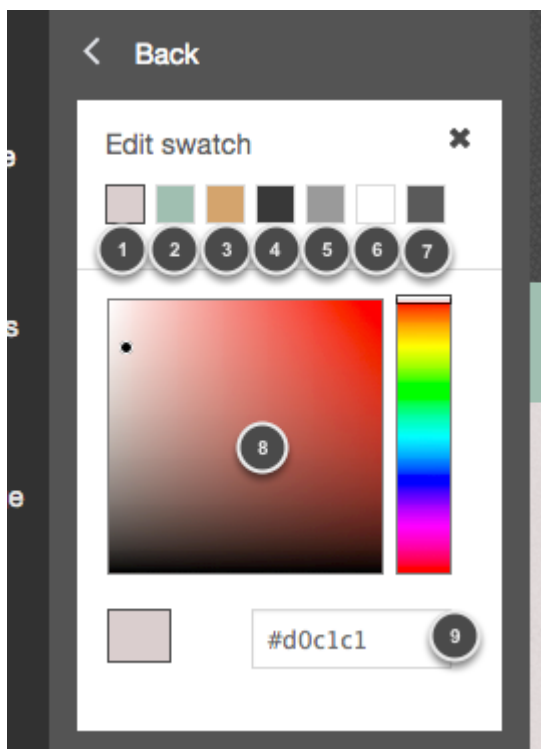

make style changes across your whole site:

1. By clicking in Browse templates you will be able to see all the templates included in your account and you can change your template whenever you want.
2. The Colours option allows you to change the colour swatch you are using or edit your own swatch.
3. You can select either a solid colour, a gradient or an image as your Background.
4. Change all the fonts and font style across your site with the Fonts button.

Colours

All our templates come with 5 different colour swatches (1) created by our professional designers to make the best out of your template. However, if you want to use your own colours, you can do it by clicking in the settings icon (2).

Each colour box changes something on your

template. Generally (but not as a rule) the colour boxes change:

1. The background of your site
2. The menu and footer background
3. Buttons and links
4. Headings and dividers
5. Paragraphs
6. Text in the navigation menu
7. Lateral navigation menu (if any).

Just click on the colour box and select the colour in the colour picker below (8) or write the HEX number (9)

Background

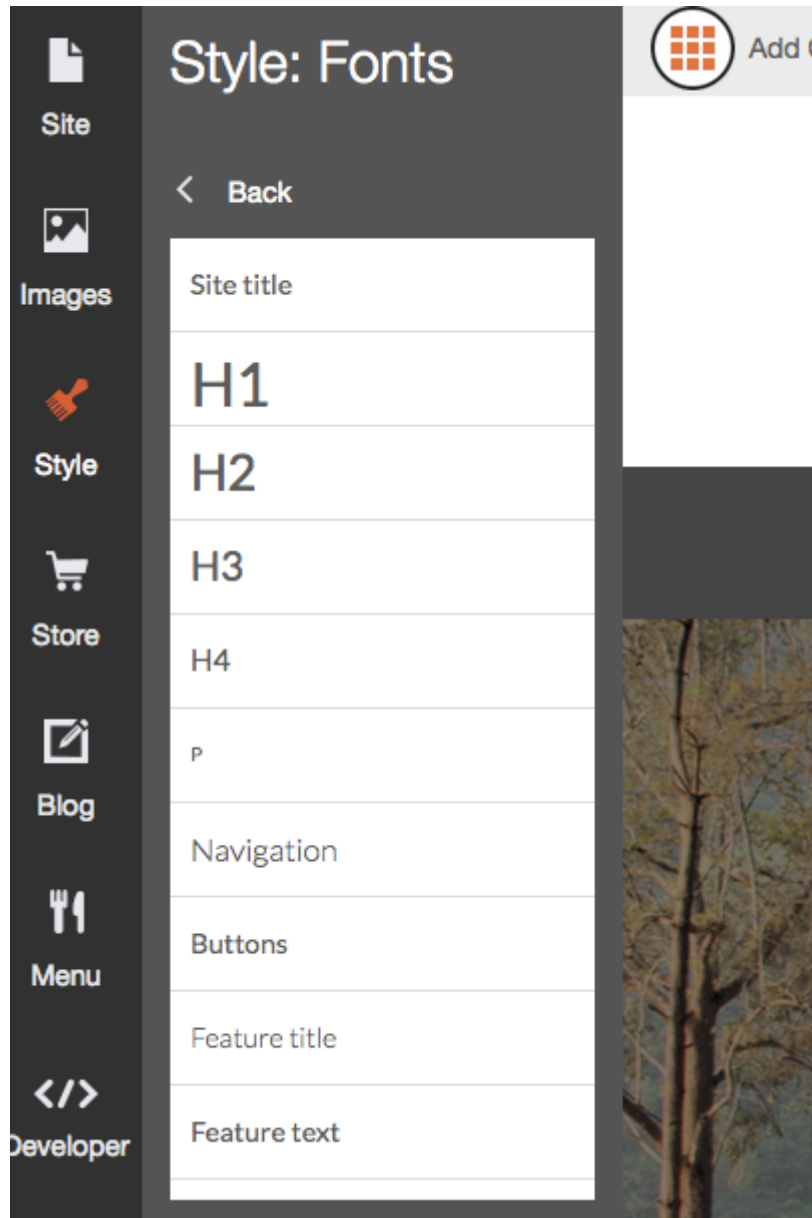

The image displays three sequential screenshots of a mobile application's settings menu, specifically the 'Background' section. Each screenshot shows a 'Back' button on the left and 'Home Page' on the right. The main content area is a preview of the selected background, with a 'Home' heading and a paragraph of Lorem Ipsum text. A small image of colorful tape is visible on the right side of the preview.

- Screenshot 1 (Top):** The 'Solid Colour' option is selected. A small green square is shown in the preview area.
- Screenshot 2 (Middle):** The 'Gradient' option is selected. A vertical gradient from light green to dark green is shown in the preview area.
- Screenshot 3 (Bottom):** The 'Image' option is selected. A repeating pattern of diagonal grey lines is shown in the preview area. Below the preview, there are settings for 'Scale' (Original Size), 'Horizontal' (Center), 'Vertical' (Top), and checkboxes for 'Horizontal repeat' and 'Vertical repeat', both of which are checked.

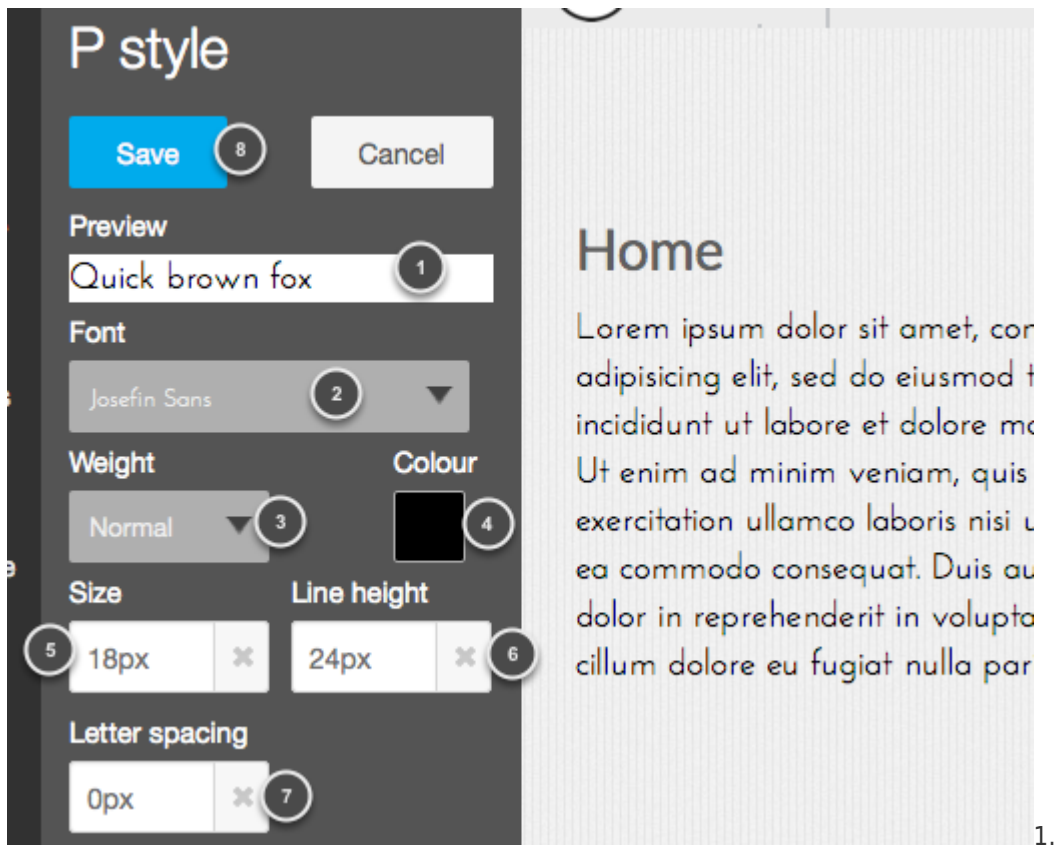

The background button in the Style tab offers 3 options to change your background. You can either choose a Solid Colour (1), a Gradient (2) or an Image (3).

If you want images for your background, you can find some patterns at [Ava7patterns](#) or [COLOURlovers](#)

Fonts

When changing the Fonts style, you will be changing the style all across your website. Just select the kind of text you want to change (for example 'p' or 'paragraph').

Here you can see how your font will look on your site.

2. Select the font from over the 35 fonts we offer in the drop down menu.
3. You can choose between a normal weight, bold or light.
4. Change the colour of your font.
5. Click here to change the size of your font.
6. The Line height will help you setting the distance between lines.
7. The default letter spacing is 0px, but you can make it larger or smaller.
8. Save your changes when you finish.
