

## What are the available Reseller tools?

- 2021-07-09 - Domain Resellers

The available online tools provided by Papaki for domain resellers are:

### - Search and WHOIS Domains Scripts

Search and WHOIS scripts for domain name availability that can be integrated into your website.

### - API commands in JSON format

Detailed and complete list of available API commands for domain registration and examples on how to use them.

### - Wordpress Plugin for domain name search

Wordpress Plugin to search the domain name availability with a built-in form for orders. The domain name registration will be completed manually by the reseller at a different time.

### - Joomla Module for domain search

Joomla Module for searching domain names availability with a built-in form for orders. The domain name registration will be completed manually by the reseller at a different time.

### - WHMCS Module & Payment Gateway

WHMCS Module for the connection and direct communication of the WHMCS platform with Papaki, as well as a implementation of Payment Gateway for payment with credit card by the final customer through Eurobank. All processes, such as domain registration, updating, or renewal, take place immediately.

### - HostBill Module

Hostbill Module for connecting and direct communication of the HostBill platform with Papaki. All processes, such as domain registration, updating, or renewal, take place immediately.
